REMOTELY MONITOR RED 9500M PureWave™

We are an approved & authorized vendor working within our partner network as a Schneider EcoXpert. We monitor your motors for heat, capacity and performance. We offer full surveillance of your systems online so you can have the peace of mind knowing your systems & motors are running efficiently at full capacity.

Our philosophy is simple: numbers don't lie. [Check our site for more information.](#)

Enjoy the benefits of an increased electrical system and asset reliability, while avoiding costly downtime by preventing power failures. Each unit is equipped with a door monitor and responsive mobile application; to provide realtime updates on all the Schneider components. Avoid electrical fires and ensure system protection, providing safety to recover from an outage and restore power safely. Each monitoring system can be connected to other 9500M PureWave™ units providing realtime sitewide updates and notifications on your cellular device 7/24. Save money by reducing energy expenditures, maintenance compliance to regulations and system sustainability at your fingertips, available in 72 countries worldwide.

7/24 MOTOR MONITORING

We offer specialized power meters designed for monitoring multiple circuits in a single hardware device without the need for separate individual power meters. Built for transactional channels, this low-cost, plug-and-play version of Power Monitoring Expert is a basic power monitoring energy management onsite solution. Award-winning EcoStruxure™ Power Monitoring Expert (PME) is purpose-built to help power-critical and energy-intensive facilities maximize uptime and operational efficiency.

As a key element of EcoStruxure Power, PME is the window to your digitized power network, taking advantage of IoT connectivity and distributed intelligence. EcoStruxure™ Power SCADA Operation (PSO) is engineered to help facilities like data centers, hospitals, industrials, airports and electro-intensive operations maximize uptime. As a key element of EcoStruxure Power, PSO is a SCADA system uniquely designed for large electrical distribution applications.

7/24 SYSTEM MONITORING

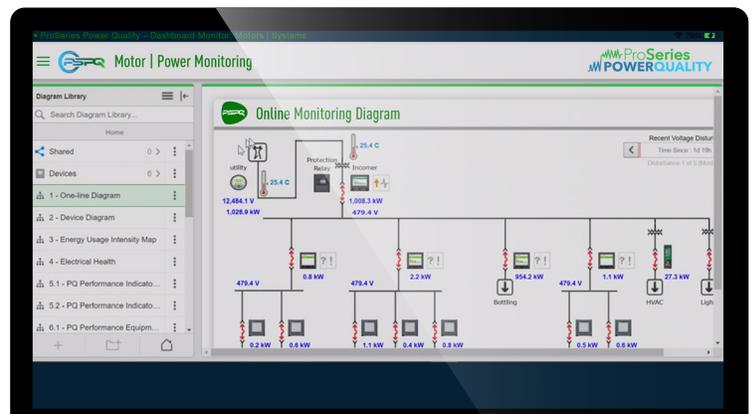

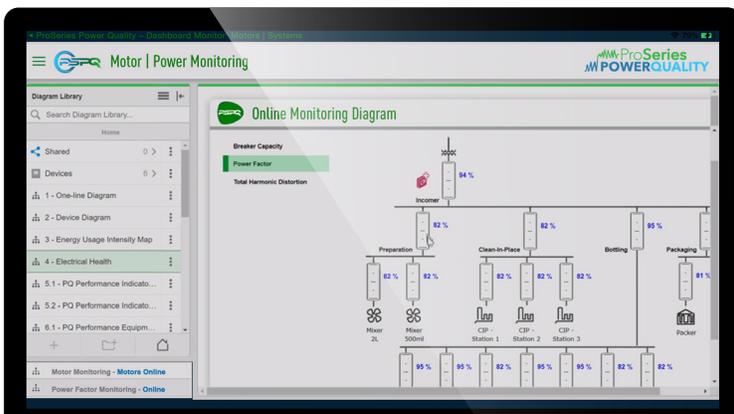

In today's rapidly advancing landscape, efficient and cost-effective connectivity for monitoring and data collection is critical. The demand for a robust, reliable solution has never been greater, especially with increasing reliance on remote and continuous monitoring technologies. We offer a superior connectivity solution specifically designed to meet your needs.

We provide 7/24 Motor and System Monitoring

Our single price point cellular and satellite service is a “Pay As You Grow” model, ensuring you only pay for what you use. This model alleviates the concerns often associated with traditional cellular or satellite plans, such as unexpected overage fees and confusing “pooled plans” that can burden clients with unpredictable costs. Choose the plan that fits your needs and have the flexibility to scale up or down based on your current data needs, without the fear of hidden fees or penalties.

Enjoy the peace of mind knowing that you can dial into any site and see your realtime data 7/24.
